WORLD LEADING NEUROTECH VTT

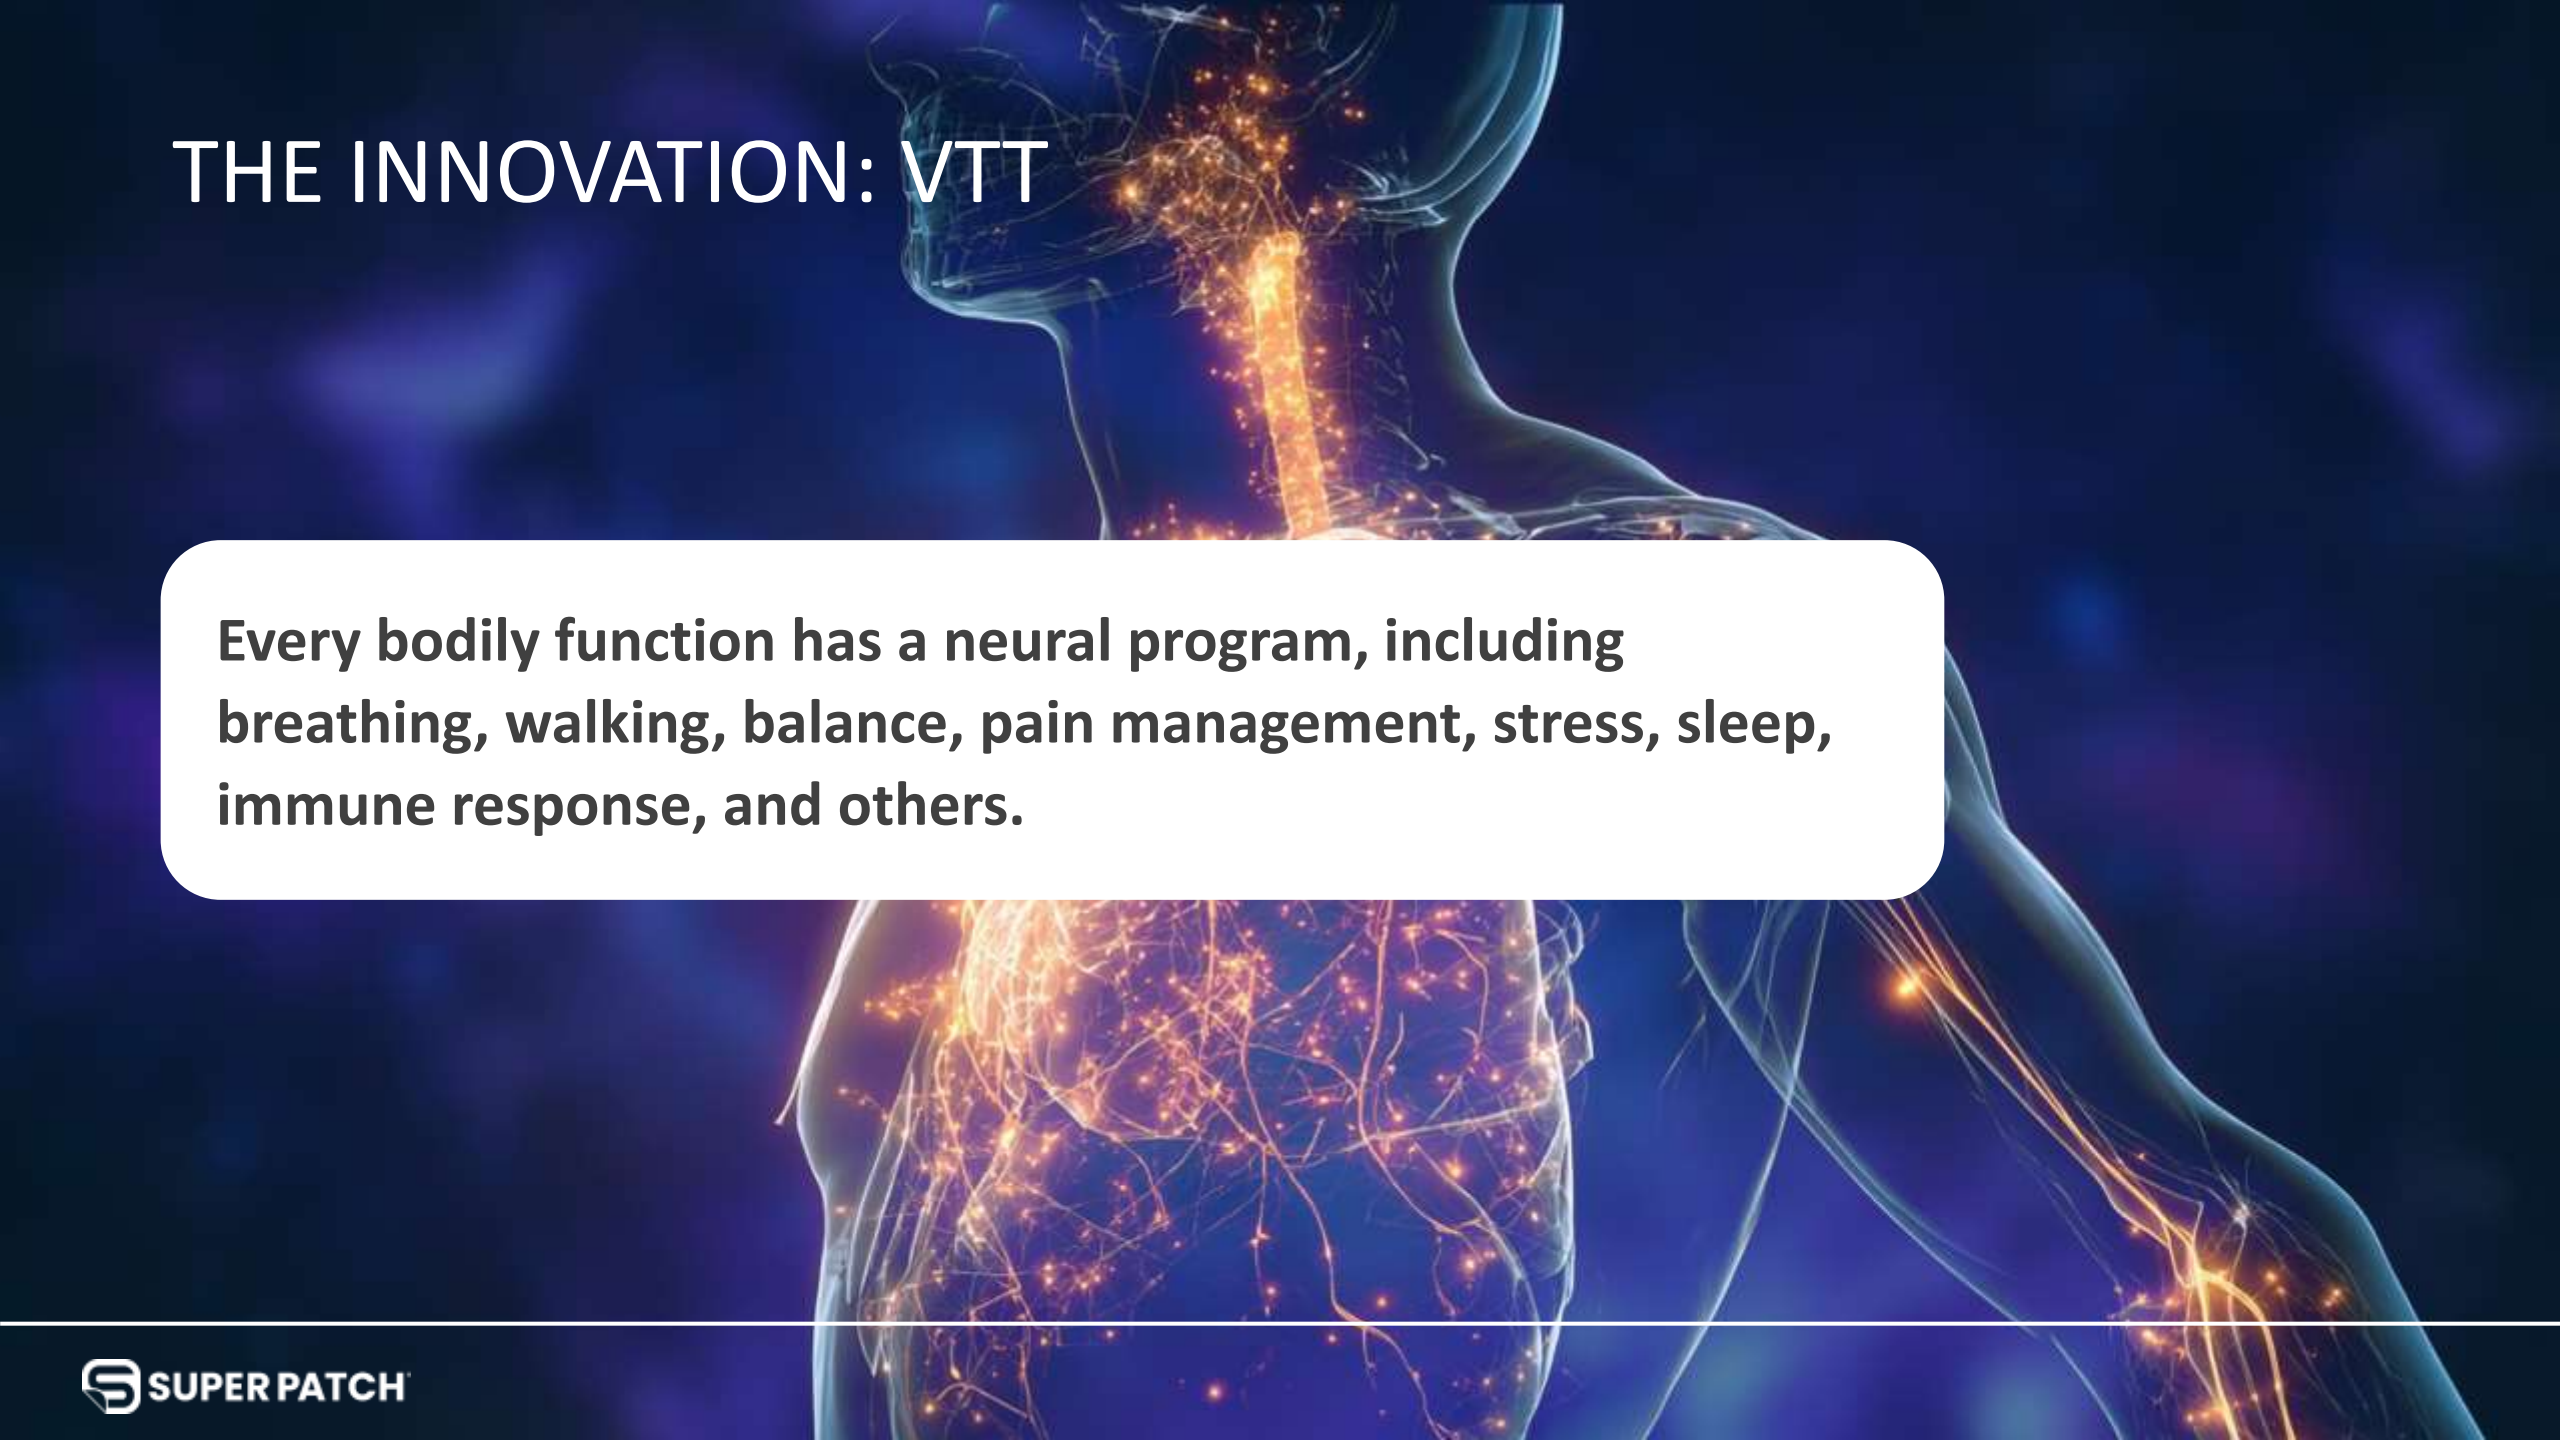

17 years

\$40 million

R&D invested on making the best possible product.

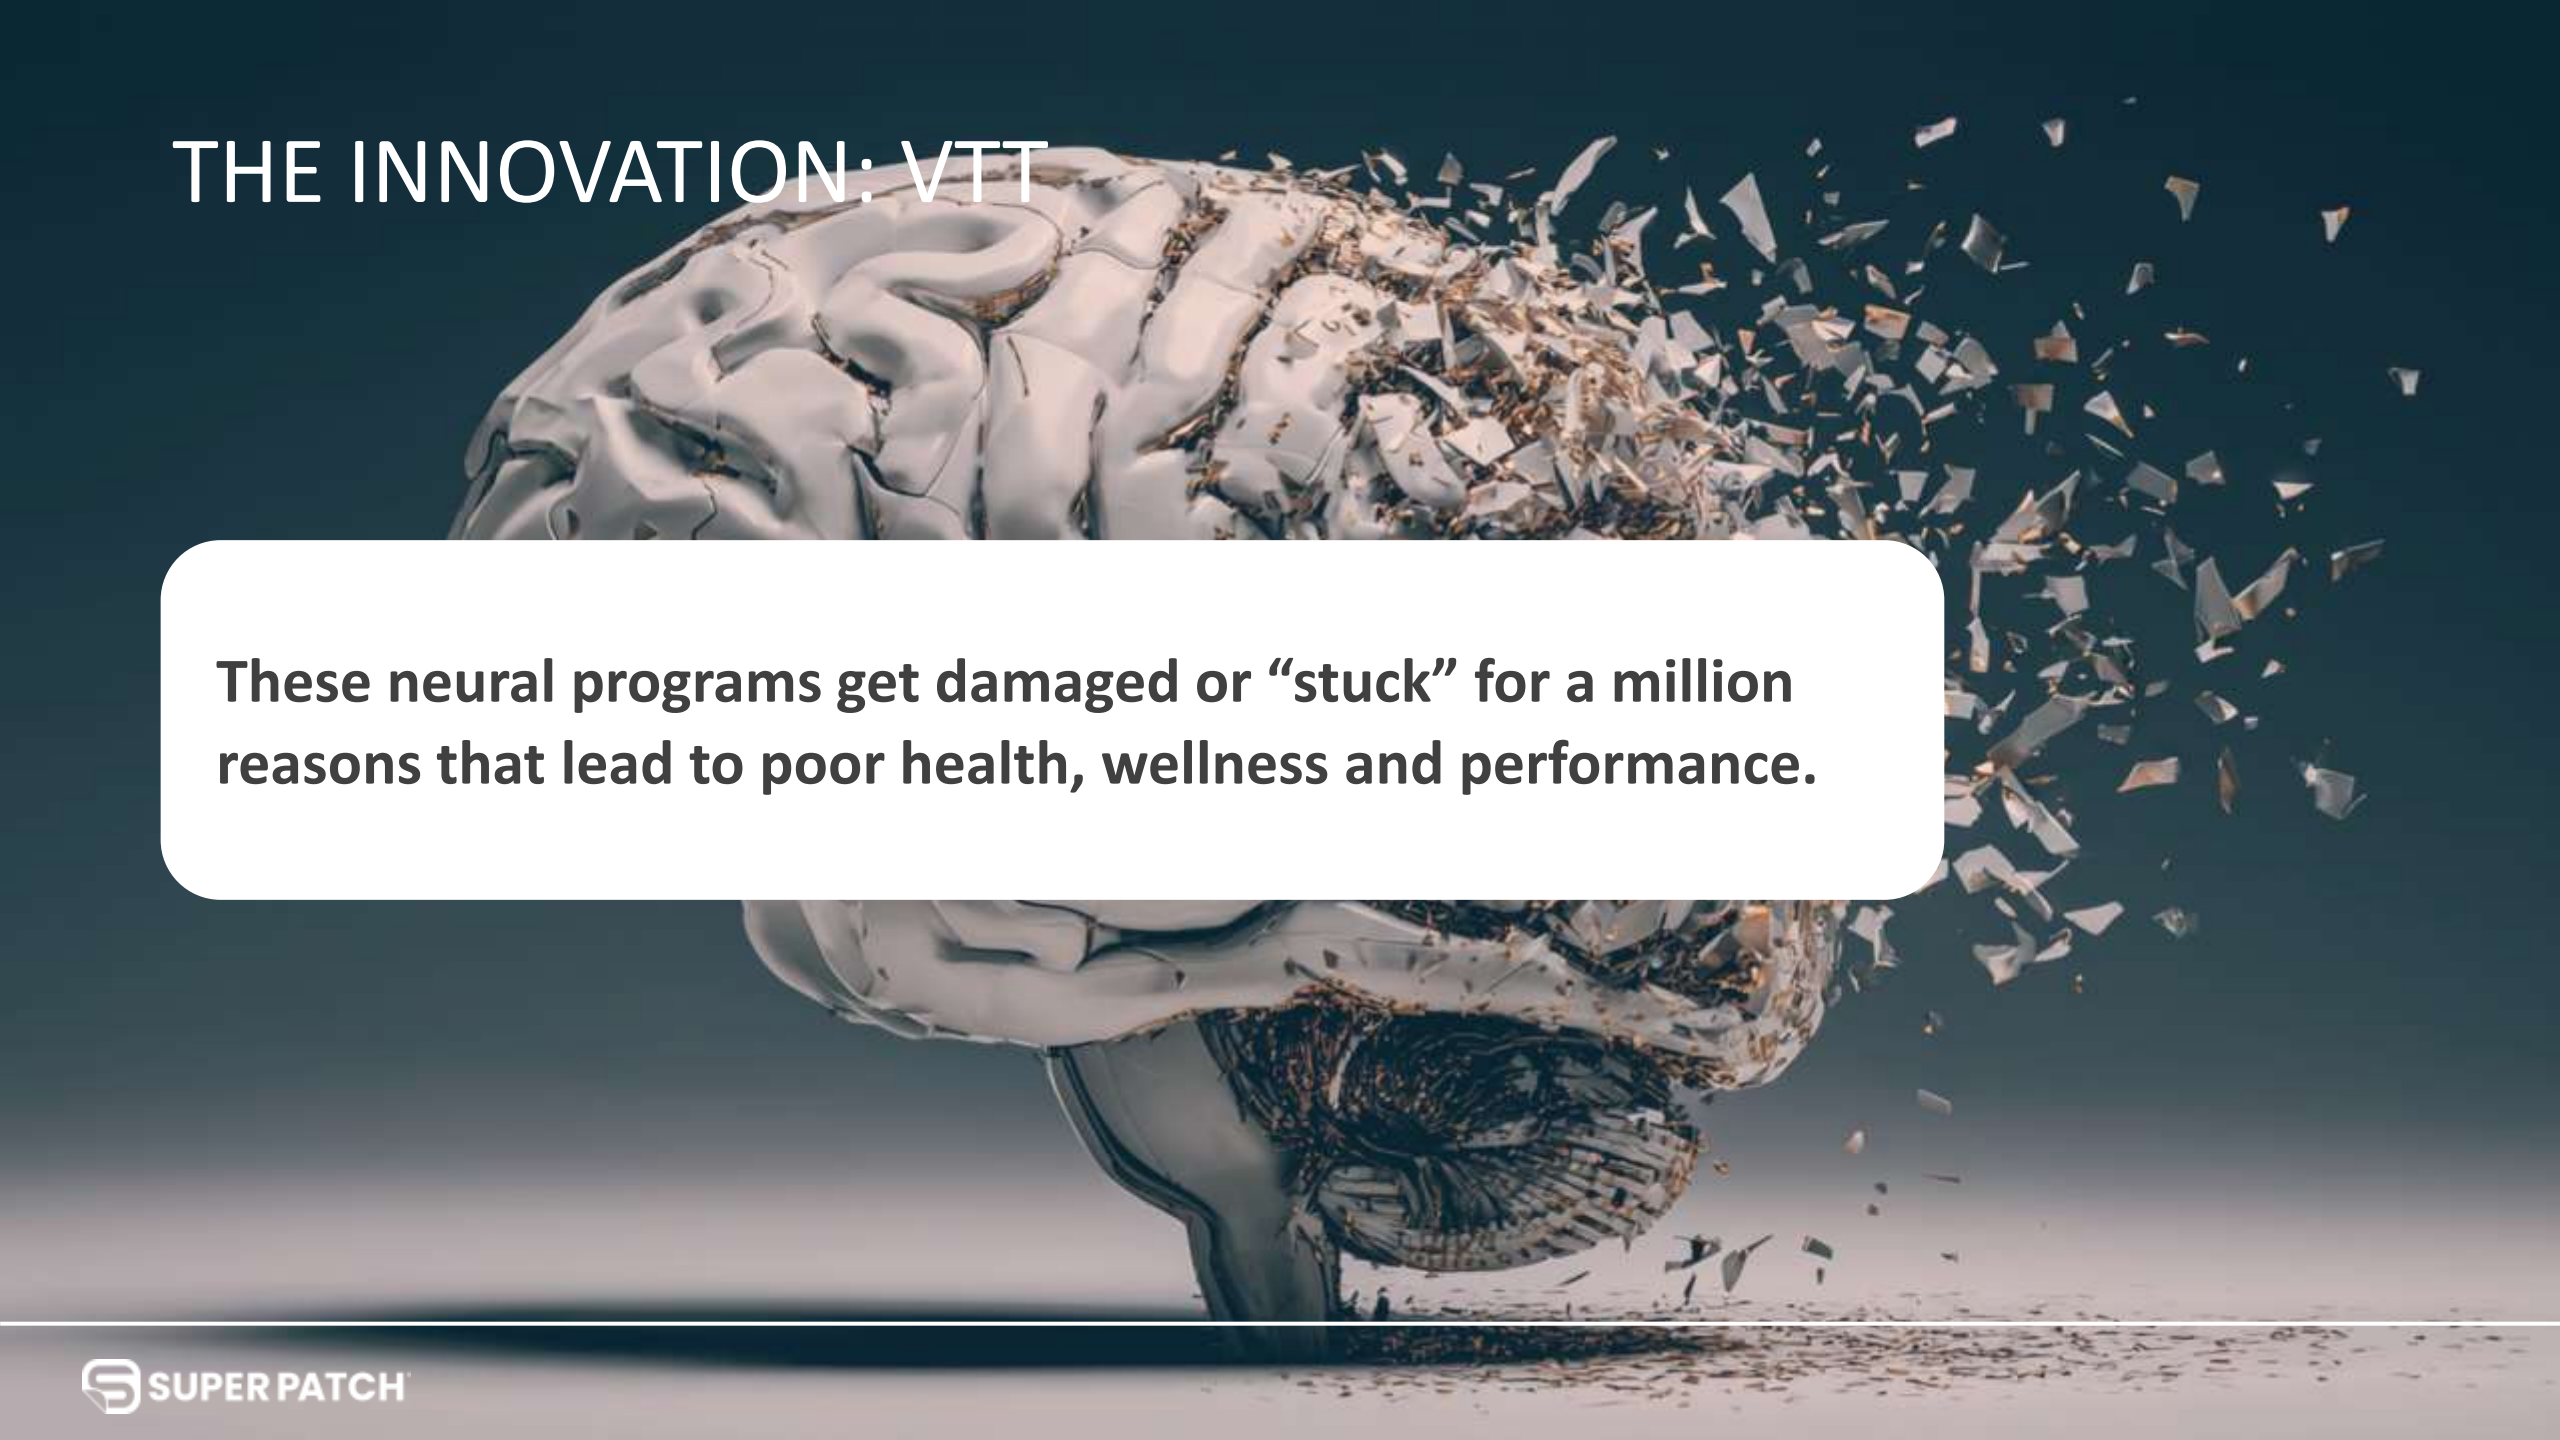

Now it's time to make it the best known!

THE INNOVATION: VTT

Every bodily function has a neural program, including breathing, walking, balance, pain management, stress, sleep, immune response, and others.

THE INNOVATION: VTT

These neural programs get damaged or “stuck” for a million reasons that lead to poor health, wellness and performance.

THE INNOVATION: VTT

The pattern and ridges on the patches trigger receptors and ion channels in the skin to generate signals “messages” that flow to the mind and help repair the neural programs, allowing our bodies and mind to operate at their highest levels. It’s called VTT.

THE INNOVATION: VTT

It's like Braille for our Brain. The same mechanisms that allow the blind to read with their fingers allow the skin to send messages to the mind.

SUPER PATCH IS BETTER?

It's almost too easy to critique the traditional health, wellness and performance solutions.

But for the sake of everyone's well-being, it was necessary to challenge them. A health and wellness solution must help, but also, DO NO HARM.

The Super Patch Advantage

Our patches work WITH your body by using your brain and body's natural potential for self-healing. Traditional fixes – stimulants, pills, energy drinks – can work AGAINST the body with unhealthy, even harmful chemicals, additives and yes, too much sugar and caffeine.

THE BENEFITS

- Drug-free**
No chemicals or pharmaceuticals
- No Side-Effects**
Only your brain/body's natural optimization
- Non-Invasive**
Works with the body. Applies directly on your skin. Pattern rests on the skin surface
- Long-Lasting Benefits**
With specific patches the benefits can be felt in minutes.

DID YOU KNOW?

Our bodies and actual cells constantly receive and transmit signals.

- In 1939 two eminent scientists, who later won Nobel Prizes for the eventual development of MRI, published a paper while at Columbia University.
- In short, 83 years ago, leading scientists of the time were proving that our bodies and actual cells constantly receive and transmit signals.

First two sentences from December 29, 1939 New York Post, "We're All Radio Stations, Columbia Scientists Reports, All Atoms, in Humans or in Steel, Found to Emit and Receive Long Waves."

Columbus, Ohio, Dec. 29 (AP). Every living thing on earth is a radio broadcasting and receiving set unconsciously sending out and receiving long-wave wireless messages.

Professor I. I. Rabi, Dr. P. Kusch and Dr. S. Millman of Columbia University told the American Association for the Advancement of Science today that all atoms, whether part of the heart tissue of man or a piece of steel, constantly emit radio waves which can be detected and measured.

COLUMBUS, Ohio, Dec. 29 (AP).—Every living thing on earth is a radio broadcasting and receiving set unconsciously sending out and receiving long-wave wireless messages.

Professor I. I. Rabi, Dr. P. Kusch and Dr. S. Millman of Columbia University told the American Association for the Advancement of Science today that all atoms, whether part of the heart tissue of man or a piece of steel, constantly emit radio waves which can be detected and measured.

Even death of an animal organism does not mean the stopping of activity, they said, since the atoms which form part of the living cell continue to emit radiation after the organism as a whole has ceased to function.

The Columbia scientists measured these radio waves from atoms for the first time and found them similar to the action of visible light, though the waves are much shorter and can be detected only by delicate exact studies of the nucleus of the atom.

All nuclei of atoms and the particles which surround them spin much like a top. The spinning is irregular, the particles of the atoms jumping with the speed of light from one point to another.

"The radio waves which we have studied are emitted when the atoms pass from one of these states to another," they said.

In their experiments, the Columbia scientists measured these radio waves with an accuracy 10,000 times better than has ever before been achieved, by shooting particles of atoms at high speed between two

DID YOU KNOW SKIN SCIENCE?

The 2021 Nobel Prize in Physiology or Medicine is awarded to David Julius and Ardem Patapoutian for their discoveries of thermal and mechanical transducers.

This answered the age-old question of how the “skin speaks to the brain” by identifying the molecular transducers responsible for detecting and converting touch into nerve impulses in the sensory nervous system.
